Recipe - make your own paint

INGREDIENTS

1 cup Corn Flour/Corn Starch
1 cup Cold Water
3 cups Boiling Water
Liquid Food Colouring

HOW TO:

In a large mixing bowl, add 1 cup of cold water to the corn flour & mixed well.

Add freshly boiled water 1 cup at a time, mixing as you go to ensure a smooth texture.

Put this mix into a saucepan over a low-medium heat and stir until it's a custard like consistency.

Add liquid food colouring to get your desired colours.

Store in a clean jar (or clean recycled squeeze ketchup bottles).

Paints will last between 2 and 3 weeks. Do test for allergies before introducing to baby's skin. Adult supervision and directed activity for a valentine keepsake

Hands - Feet - or Both!

A lovely little Valentine for your lockdown babies and toddlers
